

SUNNY BOY 700U

- > Certified to the new UL 1741/IEEE-1547
- > 10 year standard warranty
- > Rugged stainless steel enclosure
- > Exceptional reliability and energy capture ratio
- > Easy-to-install three-point mounting system
- > Comprehensive communications and data collection options
- > Modular string inverter design is easily expandable

SUNNY BOY 700U

The versatile choice for any system configuration

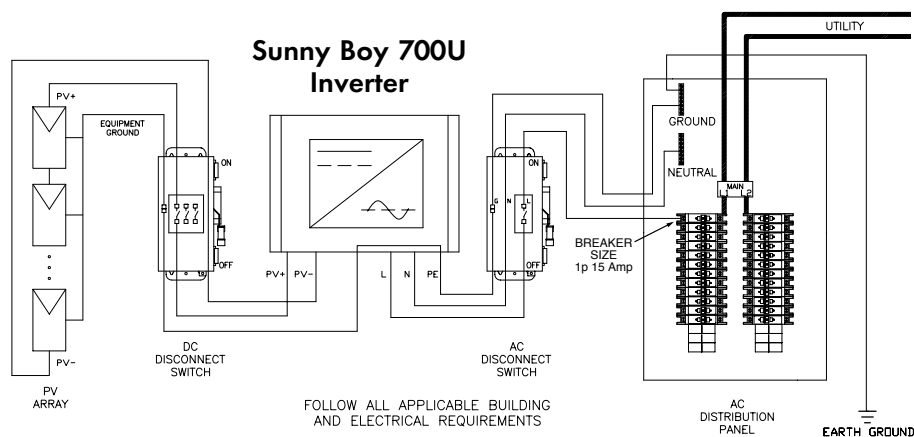

The SMA Sunny Boy 700U was SMA's first mass-produced string inverter and it continues to enjoy immense popularity in today's solar market. Its compact size and economical price make it ideal for starter or demonstration systems. It is also perfectly suited for adding a bit more power to an existing solar system. Its modular design makes expansion to almost any size system easy. Three different configurable input voltage ranges make the Sunny Boy 700U a versatile choice, whatever your system configuration.

Sunny Boy's unsurpassed reliability and efficiency are the result of SMA's manufacturing philosophy that combines simple design with robust execution. SMA's state-of-the-art maximum power point tracking performance results in greater real-world energy capture than any other grid-tied inverter. Sunny Boy's safety and reliability record is also exceptional due, in part, to the inverter's redundant grid monitoring and built-in ground fault detection and interruption protection. The inverter's IGBT power stage generates a nearly perfect sine wave with the lowest harmonic distortion in the industry and meets ultra-strict FCC EMC standards. SMA's unique string inverter technology makes future system expansion simple. SMA advanced communication options are available to satisfy almost any application.
