DR Inverter/Charger

230 VAC/50 Hz Mid-range Inverter/Charger

The DR Inverter/Charger provides dependable modified sine wave power for businesses, homes and workshops. Available in 1500 or 2400 watt models, it can power most common electrical appliances such as lights, televisions, cash registers, refrigerators, washing machines, computers, and power tools. The DR's high surge capacity gives it the ability to start difficult motor loads. Once set up, all functions of the inverter/charger are fully automatic.

Features

- Quiet, high efficiency operation.
- Front panel LED indicators and adjustable switch selectors.
- Selectable settings for flooded lead acid, gel, or absorbed glass mat (AGM) batteries.
- ▶ Three-stage battery charging (bulk, absorption, and float) for increased performance.
- Low battery, overload, and high battery, over temperature protection circuitry.
- Fast switching (grid to battery and battery to grid) for backup power.
- Low idle current (less than one watt) conserves energy when no loads are present.
- Generator compatible.

Options

- ▶ Remote battery temperature sensor (BTS) increases battery performance and life.
- Remote control and status indicator (RC8) allows you to view system status remotely.
- ▶ Side mount conduit box (DRCB) makes code-compliant DC wiring connections convenient.
